SUMMARY

As a Bachelor of Science student in Computer Science, I have developed a good foundation in programming, web development, databases, and software systems. Through projects during my studies, i have experience in developing full-stack web applications, which are created with ASP.NET, Spring Boot, Quarkus, Node.js, and React. I also have experience developing mobile applications with Flutter and Kotlin.

EDUCATION

BSc in Engineering, Computer Science, 180 ECTS

KTH Royal Institute of Technology

2023 – Present
Huddinge, Stockholm

BSc in Logistics and Economics, 180 ECTS

Södertörn University

2020 – 2023
Huddinge, Stockholm

PROFESSIONAL EXPERIANCE

Bachelor Student

Pure Consulting Group AB

Bachelor's Thesis at Pure Consulting Group AB focused on AI-driven document adaptation in consultancy workflows. The work studies how prompting and preprocessing methods affect output quality and efficiency, aiming to reduce manual effort in client- and tender-related processes.

2026 – Present
Stockholm

Warehouse Associate / Logistics Coordinator

Simplex Logistik Sverige AB

*Responsible for **order picking**, **goods reception**, and **forklift operation** (Riopool system).*

2024
Södertälje, Stokholm

Goods Receiver / Forklift Operator

Bergendahls food AB

*Managed **goods reception** and **coordinated incoming deliveries**. Operated forklifts to **optimize material flow** within the warehouse.*

2019 – 2020
Botkyrka, Stockholm

Construction Logistics Coordinator / Construction Logistics Specialist

Unicon AB

*Specialized in **on-site logistics management** for construction projects. Key tasks included **material handling and delivery** (inbärning), **inventory management**, and **site preparation** (dörr maskering, etc.).*

2018 – 2019
Huddinge, Stockholm

PROJECTS

Inventory Management & Invoicing (Web Application) [↗](#)

A full-stack web application for a food wholesale company that allows them to manage the inventory of the warehouse, track stock level, and create invoices. Built with a user-friendly interface, with full CRUD operations using modern web technologies.

Skills: Java, Docker, Javascript, React, Keycloak, HTML, CSS, MariaDB

Healthcare Journal System (Web Application) [↗](#)

A full-stack web application healthcare journal system that enables doctors and staff to diagnose patients, send messages, and upload and edit medical images. Patients can access their records, view information, and respond to messages. Built with a microservice-architecture for scalability and security.

Skills: Java, JavaScript, Spring Boot, Quarkus, Node.js, React, Docker, Kubernetes, MySQL, REST, Keycloak, Apache Kafka, HTML, CSS

Real-time Auction (Web Application) (ASP.NET) [↗](#)

A lightweight auction platform developed with ASP.NET where users can list items, place bids and track auctions in real time. Built with the focus of a clean architecture and a responsive UI to practice modern .NET web development patterns.

Skills: C#, Javascript, React, HTML, CSS, MySQL

Mobile Apps

Movie-Matcher [↗](#) , N-Back Game [↗](#) , Weather App [↗](#) , Bluetooth App [↗](#)

Skills: Kotlin, Android SDK, Android Studio, Flutter, Dart, Firebase

SKILLS

Languges

Swedish(Native), English (Fluent)

Web Development

ASP.NET Core, Node.js, Spring Boot, Quarkus, Razor Pages, RESTful APIs, React, Keycloak, Firebase, Flutter, Android SDK, Android Studio

Programming Languages

Java, C#, Python, C, SQL, JavaScript, MATLAB, Kotlin, Dart, HTML, CSS

Development & Deployment

Docker, Kubernetes, Git, Postman, Apache Kafka, Microsoft Excel, Microsoft Office
